PROFILE

Software engineer with 2 years of professional experience (coding since 2021) across frontend, full stack and AI evaluation work. I built and launched BookDex, a live multi tenant SaaS product, on my own, and I have delivered public websites for client organisations. At Georgetown Global Health Nigeria I work on digital health systems, from a health dataset platform to testing a national agency's ERP system, and on contract with Shipd I design tasks that evaluate AI coding agents. Comfortable with Git, Docker and Linux, and quick to pick up new tools.

KEY SKILLS

- Problem Solving
- Analytical Thinking
- Time Management
- Effective Communication
- Teamwork
- Attention to Detail
- Technical Writing
- Project Coordination
- Working Independently

SOFTWARE SKILLS

- HTML, CSS, JavaScript
- TypeScript
- Python, SQL
- React, Next.js
- TanStack Query, Vite
- Tailwind CSS, shadcn/ui
- Node.js, REST APIs
- Django, DRF
- Supabase, PostgreSQL
- Docker, Linux, Bash
- Git, GitHub
- Vercel
- Playwright
- Chart.js, Leaflet
- DHIS2, Moodle

WORK EXPERIENCE

SOFTWARE DEVELOPER, DIGITAL HEALTH

Georgetown Global Health Nigeria | Abuja, Nigeria | 2026 – Present

A health organisation delivering public health programmes across Nigeria.

- Developed the frontend and REST API connections for Knight Data Repository, a health dataset platform with an interactive map, charts, secure login and archival workflows (JavaScript, Tailwind CSS, Leaflet, Chart.js).
- Ran user acceptance testing on a national primary health care agency's ERP (enterprise management) system, building dashboards that traced 70+ requirements across 13 modules, logging bugs and writing workflow guides for procurement, HR and finance.
- Supervised field assessors in three states (Edo, Bayelsa, Cross River) during a nationwide health facility assessment, checked submitted data for duplicates and location errors, and wrote the state report.
- Mapped three national drug resistant TB paper forms into the DHIS2 health data system.
- Converted training quizzes into Moodle formats in five languages, and led testing and Google Play publication of Android apps.

AI CODING AGENT EVALUATION, TASK AUTHOR (CONTRACT)

Shipd | Remote | 2026

A company that builds coding challenges to train and evaluate AI coding agents.

- Authored end to end engineering tasks on production Rust codebases: a reference implementation, an 80+ case test suite, an offline containerised test harness and a written specification, built with Claude Code.
- Calibrated difficulty with data, running 10 agents per revision and replaying their patches against candidate tests to keep pass rates inside the required 10 to 50% band.

- Debugged a sealed CI sandbox (offline builds, per run database setup), confirming each fix on real runs.
- Wrote a 30+ case adversarial test suite that exposes specification gaps before review, and revised tasks from reviewer feedback over several review stages. One task was approved at human review.

FRONTEND DEVELOPER INTERN AND CONTENT REVIEWER
Flexisaf Edusoft | Abuja, Nigeria | 2024
An education software company.

- Created React interface components in an existing production codebase, working through Git in an Agile team.

PROJECTS

FOUNDER AND DEVELOPER, BOOKDEX
bookdexhub.com | Multi tenant SaaS | 2025 – Present

- Designed, built and launched a booking, client and invoicing platform for African service businesses (React, TypeScript, TanStack Query, Supabase), deployed on Vercel.
- Isolated each business's data with Row Level Security and role based staff permissions, and added staff invites, booking confirmations and PDF invoices.

ZOLIG CONSULTING WEBSITE
zolig-constructionltd.vercel.app | Next.js | 2026

- Built and deployed a responsive corporate website for a consulting firm using AI assisted tooling.

BOMAS ACADEMY WEBSITE
bomasacademy.org | TanStack Start, React 19 | 2026

- Redesigned a school's public website and staff admin area, working inside its existing codebase.

SHEFGUIDE
shefguide.onrender.com | Collaborative MSc project | 2026

- Developed the React frontend of an AI study support app for international students, with a teammate who built the backend and authentication.

EDUCATION

M.S., DATA SCIENCE AND ARTIFICIAL INTELLIGENCE
Campbellsville University | 2026 – Near completion

B.SC., SOFTWARE ENGINEERING
Babcock University | Ogun State, Nigeria | 2021 – 2025

CERTIFICATIONS AND RESEARCH

IBM DEVOPS AND SOFTWARE ENGINEERING PROFESSIONAL CERTIFICATE
IBM on Coursera

RESEARCH WRITING
Systematic literature review for a Big Data capstone, and a five chapter APA research report on AI ethics in decision making.
